Summary

UX/UI designer working on B2B SaaS products across web and mobile. I take products from research and competitor benchmarking through wireframes and UI to developer handoff.

I've been the sole designer on an LMS, co-designed a collectibles platform end to end, and led a client project on my own as designer and PM. AI is built into my daily workflow, from research to wireframes and UI: Claude, ChatGPT, Claude Code, Codex, Figma agents. Background: MSc in Mathematics.

Experience

Basa Solutions — UX/UI Designer → Middle UX/UI Designer

07/2025 – 11/2026 · promoted to Middle in 03/2026

HobbyX — collectibles platform, mobile + desktop (06–11/2026)

- Designed the product from wireframes to UI and developer handoff, in a pair with another designer.
- Owned the mobile modules Live Streaming, Stream Setup, Rip & Ship, Profile, Settings, Notifications and Sign in / Sign up.
- On desktop, designed Portfolio, Asset Add & Card Scanning, AI Grade Assessment, Sell Flow, Asset Detail and Grading Submission, using a shadcn/ui-based design system.

LMS Workiverse — learning management system (01–04/2026)

- Sole designer, working with a PM.
- Researched 5 LMS platforms hands-on and benchmarked 136 features; wrote the research and scope docs in Notion.
- Designed the Organisation Admin (11 modules) and the Course Builder, including a gamified learning mode and monetisation gating.
- First at Basa to use Figma Make for wireframes; the team later adopted it.

Premonio (GOALS) — B2B revenue planning platform (08/2025 – 03/2026)

- On the platform, moved screens from the live product into Figma, designed placeholders for screens in progress, the Optimize screen and an 8-step “How to work on the platform” diagram.
- Audited the company website and redesigned all 9 pages, including the copy; the client chose my colour concept.
- Designed customer-story PDFs and Google Slides decks.
- Led the client on my own as designer and PM: calls, summaries, ClickUp tasks, estimates.

Ad fraud protection SaaS (NDA) (08–09/2025)

- Redesigned the UI of 9 platform sections (141 screens) and finished the onboarding.
- Created 5 dashboard colour themes; the client adopted my muted colour scheme for the platform.

Research & handoff

- Ran Basa's first structured product research for Tutor IQ: competitor benchmark, personas, concept, feature list. It became the template for later research, including Flipity's scope matrix and user journey map.
- Audited the Workiverse MVP before development (19 modules) and designed the missing states, the first handoff audit at the company.
- Also took SellerGenius, Prospectory and Projectory from wireframes to UI.

Freelance Web Designer

2022 – 2024

- Designed websites for client and non-commercial projects, from portfolio sites to landing pages, with responsive layouts and handoff to developers.

Skills

- **UX:** competitor research and feature benchmarking, user interviews, information architecture, user flows, wireframing, prototyping, usability testing (Maze), handoff audits and edge states
- **UI:** design systems (shadcn/ui), components, variables, auto layout, data-heavy dashboards, iOS and Android guidelines, responsive web, motion for case studies
- **Client & project work:** client calls, requirement gathering, estimates, task planning, presentations

- **Tools:** Figma, FigJam, Figma Slides, Maze, Notion, ClickUp, Loom, Google Slides, Adobe Photoshop
- **AI workflow:** Claude, ChatGPT, Claude Code, Codex, Figma agents, Figma Make, Banani, Lovable, KlingAI, Adobe Firefly

Education

- **UI/UX Design Bootcamp** — po-lyudsky, 2024–2025. Learning project EduPortal: an education platform (web, iOS, Android, landing page) built from stakeholder and user research through Maze testing to a design system.
- **UI/UX Design Fundamentals** — po-lyudsky
- **MSc in Mathematics** — Igor Sikorsky Kyiv Polytechnic Institute, 2019–2021
- **BSc in Mathematics** — Igor Sikorsky Kyiv Polytechnic Institute, 2015–2019
